

ICT Technician - Software and Applications Programmer (job code: 261399) **3 year contract in Papua New Guinea**

This is an exciting opportunity for an IT Programmer to join our company in Papua New Guinea, Global Technologies. This three-year contract is the ideal opportunity to make your mark in a rapidly developing country.

The contract is based in Port Moresby, and comes with an attractive salary that includes accommodation.

Roles and responsibilities

Reporting to the General Manager, the primary function of this role is to write, test and maintain computer programmes to ensure that computer applications meet the needs of the users of the computer system. You will work on client and in-house projects. You will be responsible for:

- analysing, prototyping / modeling of existing IT systems
- designing, constructing, testing, implementing and maintaining software development programs
- user and operational support
- root cause analysis
- post implementation analysis to ensure successful system design and functionality
- defining operating standards and processes with System Documentation.

Skills

To fulfil this role, you need to be highly self motivated and have a demonstrated understanding of how business areas collectively integrate within application development to achieve business objectives. You will also possess:

- an ability to solve / work out moderate to complex problems through in-depth evaluation of business processes and system processes
- sound and comprehensive communication and diplomacy skills to exchange complex information
- excellent analytical skills
- a good understanding of database systems
